

Mass Envirothon 2010

Envirothon Stories- do it your way

Based on feedback from coaches and team members we've decided to greatly modify this project. We're still asking you to produce something because it is VERY useful as we raise money to keep Envirothon going.

Rather than limiting you to text however... what would be useful and fun for you?

- A flyer to hand out at the Roundtables so everyone remembers your project?
- A short video with interviews of team members and a tour of your watershed?
- A photo collage with captions?
- A cool website?
- Other creative outlets? Y'all are way more technologically savvy than I am, surprise me with something awesome.

Please send me the file digitally (or better yet, a link) so that I can make a website.

Then you can check out other teams' submissions without a sheaf of papers ending up in the recycling bin. And who really wants to write another essay??

The fine print:

1. Deadline to submit is 4 days after the Envirothon (Monday, May 17)
2. Email to massenvirothon@gmail.com
3. Please reduce photo file size to the minimum possible without sacrificing quality. (700 x 1000 dpi should be more than adequate)
4. Things you should definitely include somewhere: name of school or sponsoring organization & the town where you live.
5. Please make sure submissions are appropriate for all audiences and do not violate copyright laws.
6. If you can work with your school to post the item on your web server (or You Tube if it's a video) and just send me a link you may have more leeway in terms of file size.
7. I'm happy to answer questions via the email address above.
